HEROES Age-Inclusive Hackathon

The HEROES project aims to create a digital platform that makes finding the right caregiver fast and reliable. To help with this, we are organizing an online hackathon event from 16-17 September 2022, where we want to let interdisciplinary teams from Austria, Romania and Switzerland - with seniors as supervisors - compete to improve the care of tomorrow through special digital solutions.

What awaits you are motivated teams and supervisors, exchanges with other teams in a digital space, networking for your future and attractive prizes for the best teams (e.g. international internships).

Start: 16 September 2022

End: 17 September 2022

- Phase 1: Short introduction to the project, the use cases and the process
- Phase 2: 24h hacking session incl. intergenerational and interdisciplinary exchanges with supervisors and the other international teams
- Phase 3: Short pitch presentations of the results
- Phase 4: Jury session and announcement of the winners

Be HEROES and don't miss this unique hackathon event!

This project is co-funded by the AAL Programme, the European Commission and national funding agencies of Austria, Romania and Switzerland.
